

“

I’m a designer and builder with strong craft who loves connecting the dots and simplifying complex platforms.

MongoDB

6+ years

Staff Product Designer

Feb 2026 — Present

Founding designer for MongoDB’s new Agent Platform, building the platform from 0→1 alongside 15 engineers and 2 PMs

Define product direction, developer workflows, and user experience across the platform

Partner with Product and Engineering to shape requirements, validate direction, and align teams around what to build and how

Design and prototype CLI and UI experiences, contributing directly to implementation through code

Scale design impact by empowering engineers to design features with AI using agent skills and design patterns

Director of Product Design

2022 — Feb 2026

Drove AI adoption across the design organization through prototyping, training, and hands-on execution

Product Design Lead/Manager

2019 — 2022

Drove the design strategy for a major product release (MongoDB Serverless)

Compass

4 years
